Put a Free Coin Flow ATM Anywhere

Indoor ATM's or weatherproof outdoor ATM's can be placed almost anywhere and at any type of business or event.

Free Machine

Coin Flow offers completely free placement of the Halo II, cash dispensing, secure ATM machine inside or outside your place of business.

Free Maintenance

Coin Flow provides 24/7 monitoring and maintenance for all of our ATM's. Including cash loading, cash level monitoring and activity to ensure your ATM stays full.

Free Money

Coin Flow issues monthly commission checks to all businesses with our ATM's, based off the monthly activity of the cash machine.

Over 80% of all cash withdrawn from an ATM is used at the place of business where the money was withdrawn.

Coin Flow offers no hidden fees and some of the lowest ATM processing rates in the Midwest.

Why Use a Coin Flow ATM?

We are mobile and can service weekday or weekend indoor/outdoor events (ex: carnivals, special events, municipal festivals and tastes).

We love working with restaurants, gaming parlors, convenience stores, grocery chains, cannabis dispensaries, gas stations, shopping malls, music venues, theaters, casinos and bars. We run state-of-the-art teller machines with absolutely no cost to our customers. Our customer service is second to none with 24/7 machine monitoring and maintenance. Call us today to find out how you can make money on your location's ATM.

About Coin Flow

Coin Flow Enterprises was founded in 2018 by two Chicago area women with an entrepreneurial spirit set taking on a male dominated business space. Since then, the company has risen to be the premier ATM distributor in the Midwest. Our company promotes strong customer service principles; consistency, reputation, trust, loyalty and friendship. Our costumers are treated like family rather than business partners.

About Our ATM

The HALO II provides the best value of any retail cash dispenser in the industry with added peace of mind from enhanced security features, for free. This new member of the Hyosung retail family offers an improved UL 291 business hours safe with added break-in protection, an EMV card reader, a PCI 3.0 compliant keypad and secure communications protection using TLS (Transport Layer Security) transmission encryption.
